The earnest money of the successful tenderer will be retained as security deposit for due fulfilment of the contract. Such a deposit in cash will not carry any interest.

4. The tenders will be opened in the presence of such tenderers, who wish to be present on the 24th October 1938 at 2 P.M. 5. The name of the successful tenderer will be posted on the Notice Board in the Superintending Engineer's Office in due course. Within eight days of the acceptance of the tender, the successful tenderer will be required to execute an agreement in the Departmental schedule contract form for the due fulfilment of the contract, and for the execution of all items of work in accordance with the Bombay Specifications (1931) and Mysore P. 6. Failure to comply with the condition 5 above, or to agree to carry out the work in accordance with the specifications and agreement in force, will entail forfeiture of the earnest money.

7. The earnest money of the rejected tenderers will be returned on submission of the receipt originally granted, along with an application to the Superintending Engineer.

In regard to items of work not tendered, or estimated, the rates for the same will be calculated on the basis of current rates for materials and labour with a Contractor's profit of ten per cent as may be approved by the Superintending Engineer. This shall be final and legally binding on the tenderer.

16. The quantities given in the Schedule are only approximate and the drawings shown to the contractor are only tentative and are liable to alterations, omissions, deductions, or additions at the discretion

of the Chief Electrical Engineer or his representative. The tendered rates will hold good for any quantity, whether higher or lower than those given in the enclosed schedule.

17. The works should be completed and handed over in a tidy condition to the Electrical Department by the end of June 1939, failing which, the Superintending Engineer may, at his discretion, levy a penalty of Rs. 50 per day, which will ordinarily be calculated at 12 per cent per annum on the total outlay as liquidated damages for non-fulfilment of contract, and will be recovered from the contractor's outstandings for the period exceeded by him beyond the time fixed and until the work is completed and handed over.

18. In all matters of disputes of any kind, not specially provided for in the agreement or of rates, penalties, measurements, quality of work, etc., the decision of the Chief Electrical Engineer shall be final and legally binding.

Contractors should bear this in mind when tendering for the work. Extension of time due to delays caused by the Departmental Officers will, however, be considered on the merits of each case.

20. The contract should not be sublet.

All materials, tools and plant and machinery, that will be supplied by the Department in the interest of the work, shall be accepted by the tenderer at the rates fixed by the Superintending Engineer. Sealed tenders will be received at the Office of the Executive Engineer, Chitaldrug Division, up to 2 P.M., on 28th October 1938, for constructing two additional rooms to the Government Middle School at Chitaldrug.

2. Tenders in the prescribed form obtainable from the Office of the Executive Engineer, Chitaldrug Division, should be addressed to the Executive Engineer, Chitaldrug Division, in a sealed cover and superscribed as "Tender for constructing two additional rooms to the Government Middle School, Chitaldrug." The name of the tenderer should also be superscribed on the top of the cover.

3. Each tender must be accompanied by a deposit of Rs. 165 (Rupees one hundred and sixty-five only) should be credited to the treasury and the treasury challan only enclosed, as earnest money. The earnest money of the successful tenderer will be retained as security deposit for the due fulfilment of the contract. Such a deposit will not carry any interest. The successful tenderer will have to deposit a further sum of Rs. 165 before executing the agreement.

4. The tenders will be opened in the presence of such tenderers who wish to be present on 9th November 1938 between 2 to 5 P.M. The final acceptance of the tender will rest with the Executive Engineer, who does not bind himself to accept the lowest or any tender, or to assign any reason whatever for the rejection of any.

5. The name of the successful tenderer will be posted on the Notice Board in the Executive Engineer's Office in due course. Within eight days of the acceptance of the tender, the successful tenderer will be required to execute an agreement in the departmental Schedule Contract Form for the due fulfilment of the contract, and for the execution of all items of work in accordance with the Bombay Specifications (1931).

6. Failure to comply with the condition 5 above, or to agree to carry out the work in accordance with the specifications and agreements in force will entail forfeiture of the earnest money.

7. The earnest money of rejected tenders will be returned on submission of the receipt originally granted, along with an application to the Executive Engineer.

8. Copies of contract documents, schedules and drawings may be seen at any time at the Executive Engineer's Office, Chitaldrug, on all working days between 11 A.M. and 5 P.M. and may be obtained from that officer on payment of Re. 1.

9. Specific rates should be given for each item in the schedule accompanying the tender and the rates should be in rupees, annas and pies and expressed in words and figures. Tenders offering a percentage reduction on the estimate amount will be rejected.

10. Any rates or lumpsum amounts for the items not called for, if tendered by the tenderer, will not be taken notice of. The rates for such items may be entered in a separate schedule with date and reasons for the same.

11. No alterations which are made by the tenderers in the tender form in the nomenclature of the items of work will be recognised and if corrections are made, the tenders are liable to rejection.

12. There should be no alterations or erasures in the tenders in the rates of items and any corrections made in the rates should be attested to, and the number of corrections, if any, in each page noted at the foot of the same by the tenderer.

13. No reference should be made to the Public Works Department schedule of rates.

14. In the event of the tender being submitted by a firm, it must be signed separately and severally by each member thereof, or in the event of absence of any partner, it must be signed on his behalf by a person holding power-of-attorney authorising him to do so.

15. When once the rates tendered have been accepted, they will not be revised under any circumstances. In regard to items of work not tendered, the rates for the same will be calculated by the Executive Engineer, on the basis of current rates for materials and labour with a contractor's profit of 5 per cent as may be approved by the Superintending Engineer. This shall be final and legally binding on the tenderer.

16. The quantities given in the schedule are only approximate and the drawings shown to the contractor are only tentative and are liable to alterations, omissions, deductions, or additions at the discretion of the Executive Engineer or his representative. The tendered rates will hold good for any quantity, whether higher or lower than those given in the enclosed schedule.

17. The works should be completed and handed over in a tidy condition to the Public Works Department by the end of June 1939, failing which, the Executive Engineer may, at his discretion, levy a penalty of Re. 1 per day, which will ordinarily be calculated at 12 per cent per annum on the total outlay as liquidated damages for non-fulfilment of contract, and will be recovered from the contractor's outstandings for the period exceeded by him beyond the time fixed and until the work is completed and handed over.

18. In all matters of disputes of any kind not specially provided for in the agreement or of rates, penalties, measurements, quality of work, etc., the decision of the Chief or the Superintending Engineer shall be final and legally binding.

19. No claim for damages for delays caused by officers of the department in the execution of the work will be considered, whatever may be the reasons for such delays. Contractors should bear this in mind when tendering for the work. Extension of time due to delays caused by the departmental officers will, however, be considered on the merits of each case.

20. The contract should not be sublet.

21. All materials, tools and plant and machinery that will be supplied by the Executive Engineer in the interest of the work shall be accepted by the tenderer at the rates fixed by the Executive Engineer. The tenderer will pay the hire on tools and plant and machinery as per rules from the date of taking over of such machinery, tools and plant from the Stores to the date of return thereto, the dates considered being the dates of acknowledgments of the vouchers in each transaction.

11. No alterations which are made by the tenderers in the tender form in the nomenclature of the items of work will be recognised and if corrections are made, the tenders are liable to rejection.

12. There should be no alterations or erasures in the tenders in the rates of items and any corrections made in the rates should be attested to and the number of corrections, if any, in each page noted at the foot of the same by the tenderer.

13. No reference should be made to the Public Works Department schedule of rates.

14. In the event of the tender being submitted by a firm, it must be signed separately and severally by each member thereof, or in the event of absence of any partner, it must be signed on his behalf by a person holding power-of-attorney authorising him to do so.

15. When once the rates tendered have been accepted, they will not be revised under any circumstances. In regard to items of work not tendered, the rates for the same will be calculated by the Executive Engineer, on the basis of current rates for materials and labour with a contractor's profit of 5 per cent as may be approved by the Superintending Engineer. This shall be final and legally binding on the tenderer.

16. The quantities given in the schedule are only approximate and the drawings shown to the contractor are only tentative and are liable to alterations, omissions, deductions or additions, at the discretion of the Executive Engineer or his representative. The tendered rates will hold good for any quantity whether higher or lower than those given in the enclosed schedule.

17. The works should be completed and handed over in a tidy condition to the Public Works Department by the end of February 1939, failing which the Executive Engineer may, at his discretion, levy a penalty which will ordinarily be calculated at 12 per cent per annum on the total outlay as liquidated damages for non-fulfilment of contract, and will be recovered from the contractor's outstandings for the period exceeded by him beyond the time fixed and until the work is completed and handed over.

18. In all matters of disputes of any kind, not specially provided for in the agreement or of rates, penalties, measurements, quality of work, etc., the decision of the Superintending Engineer shall be final and legally binding.

19. No claim for damages for delays caused by officers of the department in the execution of the work will be considered, whatever may be the reasons for such delays. Contractors should bear this in mind when tendering for the work. Extension of time due to delays caused by the departmental officers will however, be considered on the merits of each case.

20. The contract should not be sublet.

21. All materials, tools and plant and machinery that will be supplied by the Executive Engineer, in the interest of the work shall be accepted by the tenderer at the rates fixed by the Executive Engineer. The tenderer will pay the hire on tools and plant and machinery as per rules from the date of taking over of such machinery, tools and plant from the stores to the date of return thereto, the dates considered being the dates of acknowledgments of the vouchers in each transaction.

4. The tenders will be opened in the presence of such tenderers who wish to be present on 21st November 1938 at Kolar. The final acceptance of the tender will rest with the Executive Engineer, who does not bind himself to accept the lowest or any tender, or to assign any reason whatever for the rejection of any.

5. The name of the successful tenderer will be posted on the Notice Board in the Executive Engineer's Office in due course. Within eight days of the acceptance of the tender, the successful

tenderer will be required to execute an agreement in the departmental Schedule Contract Form for the due fulfilment of the contract, and for the execution of all items of work in accordance with the Bombay Specifications (1931), and also furnish a security Deposit of Rs. 500.

6. Failure to comply with the condition 5 above, or to agree to carry out the work in accordance with the specifications and agreements in force will entail forfeiture of the earnest money.

This shall be final and legally binding on the tenderer.

16. The quantities given in the schedule are only approximate and the drawings shown to the contractor are only tentative and are liable to alterations, omissions, deductions, or additions at the discretion of the Executive Engineer or his representative. 18. In all matters of disputes of any kind not specially provided for in the agreement or of rates, penalties, measurements, quality of work, etc., the decision of the Chief or the Superintending Engineer shall be final and legally binding.

Notification dated 30th October 1938.

1. Sealed tenders will be received at the Office of the Executive Engineer, Bangalore Division, up to 2 P.M., on 22nd November 1938, for restoring Aralikatte Tank, Register No. 200 of Gargespura Village, Magadi Taluk.

2. Tenders in the prescribed form obtainable from the Office of the Executive Engineer, Bangalore Division, should be addressed to the Executive Engineer, Bangalore Division, in a sealed cover and superscribed as "Tender for Aralikatte Tank Register No. 200 of Magadi Taluk." The name of the tenderer should also be superscribed on the top of the cover.

3. Each tender must be accompanied by a duplicate challan for having credited the deposit of Rs. 130 into the treasury under 17(a) Public Works Deposits, or Mysore Government Bonds, duly endorsed at face value or market value, whichever is less, as earnest money. The earnest money of the successful tenderer will be retained as security deposit for due fulfilment of the contract. Such a deposit in cash will not carry any interest.

4. The tenders will be opened in the presence of such tenderers who wish to be present on 23rd November 1938 at 3 P.M. The final acceptance of the tender will rest with the Executive Engineer, who does not bind himself to accept the lowest or any tender, or to assign any reason whatever for the rejection of any.

5. The name of the successful tenderer will be posted on the Notice Board in the Executive Engineer's Office in due course. Within eight days of the acceptance of the tender, the successful tenderer will be required to execute an agreement in the departmental schedule contract form, after depositing an additional sum of Rs. 130 for the due fulfilment of the contract, and for the execution of all items of work in accordance with the Bombay specifications (1931).

6. Failure to comply with the condition 5 above or to agree to carry out the work in accordance with the specifications and agreements in force will entail forfeiture of the earnest money.

7. The earnest money of rejected tenders will be returned on submission of the receipt originally granted, along with an application to the Executive Engineer.

8. Copies of contract documents, schedules and drawings may be seen at any time at the Executive Engineer's Office, Bangalore, on all working days between 11 A.M. and 5 P.M., and may be obtained from that officer on payment of Rs. 3 for each.

9. Specific rates should be given for each item in the schedule accompanying the tender and the rates should be in rupees, annas and pies and expressed in words and figures. Tenders offering a percentage reduction on the estimate amount will be rejected.

10. Any rates or lumpsum amounts for the items not called for, if tendered by the tenderer, will not be taken notice of. The rates for such items may be entered in a separate schedule with date and reasons for the same.

11. No alterations which are made by the tenderers in the tender form in the nomenclature of the items of work will be recognised and if corrections are made, the tenders are liable to rejection.

12. There should be no alterations or erasures in the tenders in the rates of items and any corrections made in the rates should be attested to and the number of corrections, if any, in each page noted at the foot of the same by the tenderer.

13. No reference should be made to the Public Works Department schedule of rates.

14. In the event of the tender being submitted by a firm, it must be signed separately and severally by each member thereof, or in the event of absence of any partner, it must be signed on his behalf by a person holding power-of-attorney authorising him to do so.

15. When once the rates tendered have been accepted, they will not be revised under any circumstances. In regard to items of work not tendered, the rates for the same will be calculated by the Executive Engineer, on the basis of current rates for materials and labour with a contractor's profit of 5 per cent as may be approved by the Superintending Engineer. This shall be final and legally binding on the tenderer.

16. The quantities given in the schedule are only approximate and the drawings shown to the contractor are only tentative and are liable to alterations, omissions, deductions or

additions, at the discretion of the Executive Engineer or his representative. The tendered rates will hold good for any quantity whether higher or lower than those given in the enclosed schedule.

17. The works should be completed and handed over in a tidy condition to the Public Works Department by the end of May 1939, failing which the Executive Engineer may, at his discretion, levy a penalty of Rs. 130 per day which will ordinarily be calculated at 12 per cent per annum on the total outlay as liquidated damages for non-fulfilment of contract, and will be recovered from the contractor's outstandings for the period exceeded by him beyond the time fixed and until the work is completed and handed over.

18. In all matters of disputes of any kind, not specially provided for in the agreement or of rates, penalties, measurements, quality of work, etc., the decision of the Chief or the Superintending Engineer shall be final and legally binding.

19. No claim for damages for delays caused by officers of the department in the execution of the work will be considered, whatever may be the reasons for such delays. Contractors should bear this in mind when tendering for the work. Extension of time due to delays caused by the departmental officers will however be considered on the merits of each case.

20. The contract should not be sublet.

21. All materials, tools and plant and machinery that will be supplied by the Executive Engineer, in the interest of the work shall be accepted by the tenderer at the rates fixed by the Executive Engineer. The tenderer will pay the hire on tools and plant and machinery as per rules from the date of taking over of such machinery, tools and plant from the stores to the date of return thereto, the dates considered being the dates of acknowledgments of the vouchers in each transaction.

5. After conclusion of the sale, each purchaser shall pay 10 per cent of the amount in cash to the officer conducting the sale and obtain in return from him a receipt vouching for the payment of the one-tenth value as well as the initial deposit of Rs. 200. Should any purchaser fail to comply with this rule, the initial deposit of Rs. 200 shall at once be forfeited to Government and the officer conducting the sale shall be at liberty to resell the timber purchased by such defaulter who shall be required to make good any loss, but shall not participate in any profit from such resale. The money shall be paid into such treasury as the District Forest Officer may direct within the time specified.

8. If the amount is not fully paid for by the purchaser before the dates fixed above, the initial deposit as well as the other moneys already paid in shall be forfeited to Government and all or any portion of the timber not fully paid for shall be resold at the risk of the purchaser, in the manner prescribed, for default of payment of one-tenth value in clause 5 *supra*.

9. No timber lot shall be permitted to be removed by the purchaser unless it has been paid for in full, calculated at the rates at which the timber is knocked down to him at the time of sale, including

The earnest money will not be adjusted towards the value of timber until 90 per cent of the purchase money over and above the security deposit has been paid.

Conditions.

1. Each bidder shall place a deposit of Rs. 200 with the officer conducting the sale but defaulters to the department will not be allowed to bid at the sales.

(a) In the case of purchases not exceeding Rs. 200 in value, the initial deposit of Rs. 200 need not be insisted upon provided that the full purchase money is paid on the spot.

(b) The deposit of Rs. 200 to be placed with the officer conducting the sale is reduced to Rs. 50 in cases where the purchase of timber does not exceed Rs. 200 in value in Hunsur and Periyapatna Depots only.

2. Any person bidding at the sale may be required by the officer conducting the sale to state whether he is bidding on his own behalf or as an agent, and in the latter case, to produce a written authority duly signed by the principal.

3. Subject to the minima prices fixed in each case by the Chief Conservator of Forests (which will not be divulged), thehighest bidder shall ordinarily be the purchaser, but the officer conducting the sale can reject any bid or stop the sale at any stage without assigning any reason to the intending purchasers. Should any lot be disputed, it shall again be put up and sold.

4. Immediately after the lot is knocked down to him, the successful bidder shall sign his name opposite the number and specification of the lot bought by him in a book provided for the purpose. Such signature shall be held as admission on his part of having bought such lot and of having accepted the terms of the sale as herein specified. All sales of which the amount exceeds

(*iii*) That the confirmation of sales is ordered by the District Forest Officers only after the payment of the full purchase money.

5. After conclusion of the sale, each purchaser will be furnished with a memo, showing the total value and the purchase made by him. Thereupon, each purchaser shall pay 10 per cent of the amount in cash to the officer conducting the sale and obtain in return from him a receipt vouching for the payment of the one-tenth value as well as the initial deposit of Rs. 200. Should any purchaser fail to comply with this rule, the initial deposit of Rs. 200 shall at once be forfeited to Government and the officer conducting the sale shall be at liberty to resell the timber purchased by such defaulter who shall be required to make good any loss, but shall not participate in any profit from such resale. The amount due by such defaulter on account of loss from resale shall be recovered from him as a revenue demand under Section 79 of the Mysore Forest Act. In calculating such losses, the initial deposit forfeited to Government shall not be taken into account.

In cases of resales for default of payment of value where no bidders are forthcoming, it will be open to the District Forest Officer to fix such price as may appear to him to be reasonable and to proceed for the recovery from the defaulter of the balance, if any, after deducting the price so fixed from the original sale amount. A registered notice should be issued to the defaulter intimating the price fixed by the District Forest Officer for the unsold wood and the amount still due from him which will be recovered as arrears of land revenue.

The money shall be paid into such treasury as the District Forest Officer may direct within the time specified.

8. If the amount is not fully paid for by the purchaser before the dates fixed above, the initial deposit as well as the other moneys already paid in shall be forfeited to Government and all or any portion of the timber not fully paid for shall be resold at the risk of the purchaser in the manner prescribed for default of payment of one-tenth value in clause 5 *supra*. Interest at 6¼ per cent per annum will be levied on all arrears of amounts which are permitted to be paid after the due date.

9. No timber lot shall be permitted to be removed by the purchaser unless it has been paid for in full, calculated at the rates at which the timber is knocked down to him at the time of sale, excluding the 10 per cent deposit paid for the lot at the time of the sale, and no timber shall be removed from the depot unless a permit is obtained from the Forest Officer in charge of the depot. The earnest money will not be adjusted towards the value of timber until 90 per cent of the purchase money over and above the security deposit has been paid.

10. Timber purchased should be removed as early as possible, and in no case should it be allowed to remain longer than 90 days after the dates fixed in clause 7 *supra*. Timber not removed after purchase will remain in the depot at the risk of the purchaser from the date of the confirmation of the sale.

11. If the timber is not removed within the time allowed, the same may, after ten days' notice to the purchaser, be sold in public auction and the proceeds will be given to the purchaser after defraying all the expenses in connection with the resale.

12. The deposit of Rs. 200 will remain as security for the due fulfilment of all and every one of the terms of sale, on the breach of any of which by the purchaser, the District Forest Officer shall be entitled to forfeit the deposit in whole or in part and in the event of such forfeiture, the sum so forfeited shall be immediately made good by the purchaser, so long as the transaction is not finally closed. The security deposit or the balance thereof, if any, shall be returned to the purchaser after the full value of timber purchased has been paid for and the timber fully removed.

4. The tenders will be opened in the presence of such tenderers who wish to be present on 20th December 1938, at 3 P.M. The final acceptance of the tender will rest with the Executive Engineer, who does not bind himself to accept the lowest or any tender, or to assign any reason whatever for the rejection of any.

5. The name of the successful tenderer will be posted on the Notice Board in the Executive Engineer's Office in due course. Within eight days of the acceptance of the tender, the successful tenderer will be required to execute an agreement in the Departmental Schedule Contract form after depositing an additional sum of Rs. 150 for the due fulfilment of the contract, and for the execution of all items of work in accordance with the Bombay Specifications (1931).

6. Failure to comply with the condition 5 above or to agree to carry out the work in accordance with the specifications and agreements in force will entail forfeiture of the earnest money.

7. The earnest money of rejected tenders will be returned on submission of the receipt originally granted, along with an application to the Executive Engineer.

8. Copies of contract documents, schedules and drawings may be seen at any time at the Executive Engineer's Office, Bangalore, on all working days between 11 A.M. and 5 P.M., and may be obtained from that officer on payment of Rs. 3 for each.

10. Any rates or lumpsum amounts for the items not called for, if tendered by the tenderer will not be taken notice of. The rates for such items may be entered in a separate schedule with date and reasons for the same.

11. No alterations which are made by the tenderers in the tender form in the nomenclature of the items of work will be recognised and if corrections are made, the tenders are liable to rejection.

In regard to items of work not tendered, the rates for the same will be calculated by the Executive Engineer on the basis of current rates for materials and labour with a contractor's profit of 5 per cent as may be approved by the Superintending Engineer. This shall be final and legally binding on the tenderer.

16. The quantities given in the schedule are only approximate and the drawings shown to the contractor are only tentative and are liable to alterations, omissions, deductions, or additions at the discretion of the Executive Engineer or his representative. The tendered rates will hold good for any quantity, whether higher or lower than those given in the enclosed schedule.

17. The works should be completed and handed over in a tidy condition to the Public Works Department by the end of May 1939, failing which the Executive Engineer may, at his discretion, levy a penalty of Rs. 150 per day, which will ordinarily be calculated at 12 per cent per annum on the total outlay as liquidated damages for non-fulfilment of contract, and will be recovered from the contractor's outstandings for the period exceeded by him beyond the time fixed and until the work is completed and handed over.

18. In all matters of disputes of any kind not specially provided for in the agreement or of rates, penalties, measurements, quality of work, etc., the decision of the Chief or the Superintending Engineer shall be final and legally binding.

21. All materials, tools and plant and machinery that will be supplied by the Executive Engineer in the interest of the work shall be accepted by the tenderer at the rates fixed by the Executive Engineer. Dr. M. H. KRISHNA, M.A., D.LIT. (LOND.)

(Director of Archæology in Mysore)

The late Mr. Lewis Rice, Director of Archæological Researches, Mysore Government, has said while comparing the Parthenon at Athens, and the Halebid Temple:—

> ". . . . . .The Parthenon is the best example we know of pure, refined, intellectual power applied in the production of architecture design. Every part and every effect is calculated with mathematical exactness and executed with precision that never was equalled. The Halebid Temple is the opposite of all this. All the pillars of the Parthenon are identical, while no two facts of the Indian Temple are the same; every convolution and every scroll is different, ... and every part exhibits a joyous exuberance of fancy scorning every mechanical restraint. All that is wild in human faith and warm in human feeling is found portrayed on these walls. . . . . ."

7. The earnest money of rejected tenders will be returned on submission of the receipt originally granted, along with an application to the Executive Engineer.

8. Copies of contract documents, schedules and drawings may be seen at any time at the Executive Engineer's Office, Chitaldrug, on all working days between 11 A.M. and 5 P.M., and may be obtained from that officer on payment of Re. 1.

9. Specific rates should be given for each item in the schedule accompanying the tender and the rates should be in rupees, annas and pies and expressed in words and figures. Tenders offering a percentage reduction on the estimate amount will be rejected.

10. Any rates or lumpsum amounts for the items not called for, if tendered by the tenderer will not be taken notice of. The rates for such items may be entered in a separate schedule with date and reasons for the same.

11. No alterations which are made by the tenderers in the tender form in the nomenclature of the items of work will be recognised and if corrections are made, the tenders are liable to rejection.

12. There should be no alterations or erasures in the tenders in the rates of items and any corrections made in the rates should be attested to, and the number of corrections, if any, in each page, noted at the foot of the same by the tenderer.

In regard to items of work not tendered, the rates for the same will be calculated by the Executive Engineer on the basis of current rates for materials and labour with a contractor's profit of 5 per cent as may be approved by the Superintending Engineer. This shall be final and legally binding on the tenderer.

16. The quantities given in the schedule are only approximate and the drawings shown to the contractor are only tentative and are liable to alterations, omissions, deductions, or additions at the discretion of the Executive Engineer or his representative. The tendered rates will hold good for any quantity, whether higher or lower than those given in the enclosed schedule.

17. The works should be completed and handed over in a tidy condition to the Public Works Department by the end of April 1939, failing which the Executive Engineer may, at his discretion, levy a penalty of Rs. 10 per day, which will ordinarily be calculated at 12 per cent per annum on the total outlay as liquidated damages for non-fulfilment of contract, and will be recovered from the contractor's outstandings for the period exceeded by him beyond the time fixed and until the work is completed and handed over.

18. In all matters of disputes of any kind not specially provided for in the agreement or of rates, penalties, measurements, quality of work, etc., the decision of the Chief or the Superintending Engineer shall be final and legally binding.

Contractors should bear this in mind when tendering for the work. Extension of time due to delays caused by the departmental officers will, however, be considered on the merits of each case.

21. All materials, tools and plant and machinery that will be supplied by the Executive Engineer in the interest of the work shall be accepted by the tenderer at the rates fixed by the Executive Engineer.
